EDUCATION

Indian Institute of Information Technology

Bachelor of Technology - Information Technology; GPA: 8.70/10

Courses: Computer Science, Data Structures and Algorithms, Database Management Systems, Software Engineering, Design Patterns, Object Oriented Programming, Operating Systems, Artificial Intelligence, Discrete Math

Bhopal, India

Dec 2021 - May 2025

EXPERIENCE

Cred

Sep 2024 - Present

Automation Engineer Intern

- Designed and developed a utility service to streamline the storage, maintenance and tracking of test cases for entire organisation resulting in more than **90% reduction in Testrail costs**.
- Automated more than 30 E2E test cases for Rest APIs using TestNG and Java, increasing coverage by **50%**.
- Automated more than 40 E2E flows for Android and IOS applications using appium and java client.

Infinity Learn

Oct 2023 - Dec 2023

Software Engineer Intern

- Implemented staging CI/CD pipelines utilizing **AWS Amplify**, reducing deployment time by 30%.
- Optimized SEO, accessibility, and responsiveness, successfully supporting monthly user **traffic of 500,000**.

GreyFeathers

Dec 2022 - Oct 2023

Software Engineer Intern

- Developed user interfaces and integrated server APIs using React and Redux, enhancing project functionality.
- Translated over **200 Figma designs** into functional React components, employing Material UI and Tailwind CSS.
- Resolved cross-browser compatibility and dependencies concerns, resulting in a **25% boost in website traffic**.
- Addressed and resolved over 60 client issues, ensuring consistent support and maintenance for established projects.

PROJECTS

Ayurmitram | github - Express JS, React JS, Random Forest Classification

Dec 2023

- Programmed an **AI chatbot** that classifies individual prakruti(phenotype) into 7 distinct categories.
- Secured sensitive data by implementing encryption and time-limited storage upto 1 week in MongoDB database.

Brain Tumor Classification | github - Neural Networks, Classification models

Nov 2024

- Used CNN, VGG16 and ResNet 50 models to perform brain tumor classification and made a comparative study.
- Processed 4000+ MRI images and classified them into 3 categories - glioma, meningioma and no tumor.

Backpack | github - Django REST Framework, React JS

Jan 2023

- Devised a resource-sharing platform that promoted collaborative book exchanges among college students.
- Conducted unit and integration testing on over 10 endpoints, utilizing Postman to ensure system reliability.

SKILLS

Languages: Java, Python, JavaScript, SQL, Node, CSS, HTML, C++, TypeScript, Bash, Regex
Frameworks: Dropwizard, ReactJS, Flask, Django, Django REST Framework, ExpressJS, Numpy, Pandas
Tools: CI/CD, Git, MySQL, Postgres, NoSQL, Dynamo DB, Mongo DB, APIs, RESTful API, JWT, JSON
Platforms: AWS, Jira, Github, Linux, Postman, Docker, Hoppscotch, Retool

ACHIEVEMENTS

- Attained **1st place in SIH 2023** by developing an innovative chatbot designed to determine individual phenotypes.
- Achieved a **3-star** rating of 1774 on Codechef, placing in the top 4.44% with a rating of 1906 (**knight**) on Leetcode.
- Consistently ranked within the **top 200** globally in Codechef Starters, with best positions of 99, 126, and 160.
- Secured 2nd place at HackSquad 2022, demonstrating excellence in competitive open-source contribution.
- Placed 4th in a college-level competitive coding event hosted by the Codame Club at IIIT Bhopal.

POSITIONS OF RESPONSIBILITY

GNU/Linux Users Club - IIIT Bhopal

Aug 2022 - Jul 2023

Core team member

- Organized 3 workshops emphasising the importance of open source. Reached 500+ students through these events.

CERTIFICATIONS

Javascript algorithms and data structures, Relational Databases, Responsive Web Design - freeCodeCamp
CS50W - Web Programming with Python and JavaScript, CS50x - Harvard University
Google Cloud Skill Badges (30 badges, 15 labs) - Google Cloud community India
